SUMMARY

Information Technology graduate with First-Class Honors from King Abdulaziz University, passionate about web development and artificial intelligence. I have hands-on experience working on various technical projects, most notably my graduation project, Dentek—a web platform that assists dentists in analyzing X-ray images using AI models. Additionally, during my internship at Salamtech, I gained practical experience in developing web applications and building chatbots.

EDUCATION

Bachelor of Information Technology 2022 – 2026 | Jeddah
King Abdulaziz University GPA: 4.84/5.0 | Expected Graduation: June 2026

WORK EXPERIENCE

Full-Stack & AI Developer Intern | SallamTech 05/2025 – 07/2025 | Jeddah

- Designed and developed part of the agricultural platform interfaces using React.
- Designed and developed a chatbot using Botpress to support customer service and answer frequently asked questions.
- Connected the chatbot to the database using Supabase to retrieve requested information and provide answers to users.
- Integrated the chatbot with platform interfaces to allow users to access the chat service directly.

PROJECTS

Dentek – AI-Powered Dental X-Ray Analysis System 09/2025 – 06/2026
(Graduation Project)

- Developed an AI model using YOLOv8-OBb to analyze X-ray images and detect pathological conditions. Integrated the AI model with system interfaces to display analysis results to the doctor
- Integrated Groq AI to generate recommendations for the doctor based on analysis results.
- Designed and developed platform interfaces using React.
- Developed the analysis report interface to display findings and recommendations, with PDF download and doctor note functionality.

Mustarad – University Lost & Found Platform 2024

- Designed and developed the login and homepage interfaces for the platform.
- Developed functions using PHP to validate inputs and process user data.
- Contributed to developing a platform for reporting lost and found items.

JavaScript Essentials 1 -Cisco Networking Academy [↗](#)
JavaScript Essentials 2 – Cisco Networking Academy [↗](#)
Introduction to Large Language Models – IBM SkillsBuild [↗](#)
Use Generative AI for Software Development – IBM SkillsBuild [↗](#)
Build Your First Chatbot – IBM SkillsBuild [↗](#)

SKILLS

- **AI & Computer Vision:** Deep Learning, Computer Vision, Image Processing, YOLOv8-OBb
- **Full-Stack Development:** React, API Integration
- **Databases & Cloud:** PostgreSQL, Supabase
- **Programming:** Python, JavaScript, HTML, CSS
- **AI & Development Tools:** Groq AI, Botpress
- **Professional Skills:** Problem Solving, Teamwork, Communication, Fast Learning, Leadership
